FINANCIAL POLICY

We are committed to meeting your health care needs. Our goal is to keep your insurance or other financial arrangements as simple as possible. In order to accomplish this cost-effective manner, we ask that you adhere to the following guidelines:

- 1. Payment is expected at time of service.
- 2. We will file your insurance for you if we are a participating provider of your plan. You will be responsible for any and all services in excess of your insurance limits as well as all non-covered services.
- 3. All co-payments are due at the time of service.
- 4. If we are not participating providers of your plan, full payment is due at the time of service, unless prior arrangements have been made. We will give you complete forms that will be accepted by your insurance company for reimbursement.

We will mail to you a monthly billing statement for any outstanding balances.

By signing at the bottom of this page, I acknowledge that I understand and accept this financial policy.

In order to accommodate the needs and requests of our patients, we have enrolled in numerous managed care insurance programs and participate with Medicare. We have contracts with these insurance carriers, as you do with your carrier, which obligate us both to certain requirements.

If you are enrolled in **Medicare**, we are obligated by law to attempt to collect your co-insurance. Medicare has a fee schedule that we must abide by. Medicare reimburses us 80% of the allowable amount and expects you to pay the 20%. If you have a Medigap or supplemental plan, the secondary will pay your 20%. You are also expected to pay your deductible at the beginning of each year.

If you are enrolled in a managed care plan, you are required to pay a co-payment at the time you receive services. This amount caries by insurance plan and the type of service you are receiving. As we are a specialty service, you must be referred by your primary care physician, who must provide us with a referral number. Many of the plans also require that we obtain a pre-certification number authorizing us to perform services other than normal office visits, such as surgical procedures and hospital services. Unless these **referral and pre-certification** numbers are obtained prior to providing services, no payment will be made. To assist you, Georgia Spine and Neurosurgery Center will make calls to verify your insurance requirements and to obtain these numbers, but it is often very difficult to hat a response. Please assist us by requesting a referral number from your primary care physician and ensuring that we have these numbers prior to your visit. Be aware that these are also **Medicare and Medicaid managed care** programs available that also have theses requirements.

Notify us immediately if you obtain new insurance or your insurance changes.

If you have a secondary insurance plan, we will file one copy for your benefit. However, in 90 days the balanced will be turned over to you for payment.

If you have no insurance, a Financial Counselor will contact you to set up a payment plan. If you are unable to meet the payments, your physician will be contacted to recommend a method of providing services that will meet your financial needs.

PRIVACY POLICY

By signing at the bottom of this page, I acknowledge that I have reviewed a copy of the Georgia Spine & Neurosurgery Center's
notice of privacy policies. I understand that a complete copy of the policy is available on Georgia Spine & Neurosurgery Center's
website (<u>www.GaSpine.com</u>) or by print at the office upon request.

This signature acknowledges that I have read and understand both the Financial and Privacy Policies.

PAIN MEDICATION & PERSCRIPTION POLICY

Georgia Spine & Neurosurgery Center can only provide pain medication for patients who require a surgical procedure. Our practice does not provide long-term pain management services. The following outlines our pain medication prescription policy:

- Patients may be prescribed pain medication during our initial evaluation and surgical preparation period, if it is felt that surgery will likely be required. If surgery is not required, the patient will be referred back to his or her primary care physician to manage pain or make additional referrals.
- If surgery is necessary, pain medication will be prescribed prior to surgery if needed. Pain medication may also be prescribed for a predetermined period of time after the procedures performed. During the recovery process, the amount of medication will be gradually reduced to help the patient avoid dependence on the drug.
- Pain medication is to be taken as prescribed. Patients are not to increase medication dosage without consulting a nurse, physician assistant or physician of Georgia Spine & Neurosurgery Center.
- Improper use of medications can lead to the termination of the physician-patient relationship.
- So that we may carefully review all patient records, we require a 24-hour advance notice for prescription refills.
- Requests for prescription refills can only be accepted during regular office hours. Because we must have access to a patient's medical records, prescriptions cannot be filled in the evening, on weekends or holidays. Refill requests after noon on Friday will not be filled until the following Monday.
- If long-term pain management is required, the patient will be referred to a pain clinic or to his or her primary care physician.
