

Curriculum Vitae

Kaveh Khajavi, MD, FACS, FAANS

Board Certified, American Board of Neurological Surgery

Khajavi1@gmail.com

Cell: (404) 345-6334

Georgia Spine & Neurosurgery Center Southeastern Neurosurgical Specialists

980 Johnson Ferry Rd, #490, Atlanta, GA 30342

Phone: (404) 299-3338 or (404) 780-7811

Fax: (404) 299-3315 Web : GAspine.com

Certification & Licensure

- Diplomat of the American Board of Neurological Surgery since 1999 (FAANS)
- Fellow of the American College of Surgeons since 1998 (FACS)
- Georgia State Medical License since 2002

Current (& Recent) Positions

- Founder and President, Georgia Spine & Neurosurgery Center, Atlanta, GA. (2003-present)
- Founder & Chief Medical Officer, StartBox® LLC, Atlanta, GA.
- Neurosurgical Consultant, **Atlanta Falcons Football Club**, Atlanta, GA (2008-2020)
- Neurosurgical Consultant, **United States Major League Rugby**
- Team Neurosurgeon, Rugby ATL, Atlanta GA (2019-2020)
- Lead Neurosurgeon, Shepherd Center Complex Concussion Clinic
- Neurosurgical Consultant, Georgia State University Athletic Department, Atlanta, GA
- Medical Advisory Board, Aspire Medical Partners, Atlanta, GA
- Surgical Advisory Board, Spinal Simplicity, Overland Park, KS
- Board of Directors & Advisory Board, Brain Injury Association of Georgia, Atlanta, GA
- Director of Neurosurgery, Scottsdale Center for the Advancement of Neuroscience, Scottsdale, AZ
- Advisory Board, Kids & Pros Inc., Atlanta, GA
- Team Neurosurgeon, Georgia Swarm Professional Lacrosse Club, Atlanta, GA (2013-2020)
- Team Neurosurgeon, Atlanta Rollergirls, Atlanta, GA (2013-2020)
- Board of Directors, Georgia Concussion Coalition, Atlanta, GA (2011-2014)

- Chairman Board of Directors, Institute for Neurosurgical & Spinal Research Foundation (INSPIRE), Atlanta, GA (2012-2019)
- Neurosurgical Consultant Atlanta Thrashers Hockey Club, Atlanta, GA (2009-2011)
- Team Neurosurgeon, Atlanta Silverbacks, NASL, Atlanta, GA (2013-2016)
- Director of Minimally Invasive Spine Surgery, Piedmont Physicians Neurosurgery (2015-2018)
- Director of Neurosurgical Services, The Shepherd Center (2015-2018)
- Medical Executive Committee Member, The Shepherd Center (2015-2018)
- Director of Neurosurgery, Sports Concussion Institute, Atlanta, GA (2012-2016)
- Chief of Neurosurgery, DeKalb Medical Center, Decatur GA (2006-2011)

Previous Employment History

- **Nov 2018 - present: Southeastern Neurosurgical Specialists, Northside Hospital, Atlanta, GA**
- 2015-2018: Director Minimally Invasive Spine Surgery, Piedmont Atlanta Hospital, Atlanta, GA
- **2003 - present: Founder, Georgia Spine & Neurosurgery Center**
- 2006 – 2011: Chief of Neurosurgery, DeKalb Medical Center, Decatur, GA
- April 2004- Nov 2018: Neurosurgeon, Piedmont Atlanta Hospital, Atlanta, GA
- Mar 2002 – Sept 2003: Neurosurgeon, WellStar Health Systems, Marietta, GA
- July 2000 – Feb 2002: Neurosurgeon, Houston Spine and Neurosurgery Center, Houston, TX
- Sept 1997 – July 2000: Staff Neurosurgeon, Walter Reed Army Medical Center, Washington, DC
- Aug 1996 – Sept 1997: Staff Neurosurgeon, William Beaumont Army Medical Center, El Paso, TX

Academic Appointments

- Adjunct Professor, Dept. of Physical Therapy, Georgia State University, Atlanta GA
- Adjunct Professor, Dept. of Physical Therapy, Mercer Univ. College of Health Professions, Atlanta, GA
- Chief, Epilepsy and Functional Surgery Section, Department of Neurosurgery, Walter Reed Army Medical Center, Washington, DC (1997-2000)
- Assistant Professor, Department of Surgery, Uniformed Services University of the Health Sciences, Bethesda, MD (1997-2000)
- Assistant Professor, Department of Neurology, Uniformed Services University of the Health Sciences, Bethesda, MD (1997-2000)

Residency

- General Surgery Internship, Baylor College of Medicine, Houston, TX. June 1989- Feb 1991
- Neurosurgery Residency, Cleveland Clinic Foundation, Cleveland, OH. Mar 1991- July 1996

Education

- Bachelor of Arts (Chemistry), Emory University, Atlanta, GA. May 1985
- Doctor of Medicine, Georgetown University School of Medicine, Washington, DC. May 1989

Military Background

- Commissioned 2nd Lieutenant, United States Air Force, April 1985
- Promoted to Captain, United States Air Force, May 1989
- Promoted to Major, United States Air Force, July 1996
- Air Force Commendation Medal, Oct 1997
- Meritorious Service Medal, May 2000

Professional Affiliations (current or former)

- American College of Surgeons
- American Association of Neurological Surgeons
- Society of Lateral Access Surgery (Founding Member)
- AANS/CNS Joint Spine and Peripheral Nerve Section
- Society of Minimally Invasive Spine Surgery
- International Society for the Advancement of Spine Surgery

- North American Spine Society
- AANS/CNS Trauma and Critical Care Section
- Congress of Neurological Surgeons
- Military Spine Study Group
- Georgia Neurosurgical Society
- Georgia Concussion Coalition

- Brain Injury Association of Georgia
- Medical Association of Georgia

Completed Multicenter Trials

1. A Phase 1/2a Dose Escalation Study of AST-OPC1 in Subjects with Cervical Sensorimotor Complete Spinal Cord Injury. Study sponsored by Asterias Biotherapeutics,^[1] Menlo Park, CA 94025
2. A Prospective, Non-randomized, Multicenter Evaluation of the Utility of Transcutaneous Stimulation of the Lumbosacral Nerve Roots During XLIF® and its Relationship to Postoperative Nerve Health. Study sponsored by NuVasive, San Diego, CA.

Publications

1. Guiroy A, De Andrada-Pereira B, Camino-Willhuber G, Berjano P, Buckland A, Gagliardi M, **Khajavi K**, Thomas A, Menezes C, Lehman R, Uribe J. Patents

1. Percutaneous Pedicle Screw Revision System

Publication number: 20210113245

Abstract: The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

Type: Application

Filed: December 9, 2020

Publication date: April 22, 2021

Inventors: Kaveh Khajavi, David E. Lane, II

2. Percutaneous pedicle screw revision system

Patent number: 10888355

Abstract: The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

Type: Grant

Filed: July 6, 2018

Date of Patent: January 12, 2021

Assignee: Spinal Elements, Inc.

Inventors: Kaveh Khajavi, David E. Lane, II

3. Safety-Blade Dispenser and Related Methods

Publication number: 20200261177

Abstract: Safety-blade dispensers for safely storing surgical blades prior to surgery and optionally for retrieving used surgical blades after surgery. In either case, the safety-blade dispenser is configured to store one or more surgical blades in an orientation that allows a user to simply and safely attach a surgical tool handle to the surgical blades (and optionally remove the handle from the surgical blades) without requiring the user to physically touch or manipulate the surgical blades by hand. The safety-blade dispensers disclosed herein may be used alone or in conjunction with a system and method of preventing wrong-site surgery.

Type: Application

Filed: September 16, 2019

Publication date: August 20, 2020

Inventors: Kaveh Khajavi, David E. Lane, II, Luke Boland, Christopher Davis, John G. Kerwood

4. Safety-blade dispenser and related methods

Patent number: 10413378

Abstract: Safety-blade dispensers for safely storing surgical blades prior to surgery and optionally for retrieving used surgical blades after surgery. In either case, the safety-blade dispenser is configured to store one or more surgical blades in an orientation that allows a user to simply and safely attach a surgical tool handle to the surgical blades (and optionally remove the handle from the surgical blades) without requiring the user to physically touch or manipulate the surgical blades by hand. The safety-blade dispensers disclosed herein may be used alone or in conjunction with a system and method of preventing wrong-site surgery.

Type: Grant

Filed: May 4, 2017

Date of Patent: September 17, 2019

Assignee: STARTBOX, LLC

Inventors: Kaveh Khajavi, David E. Lane, II, Luke Boland, Christopher Davis, John G. Kerwood

5. Percutaneous Pedicle Screw Revision System

Publication number: 20180310963

Abstract: The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

Type: Application

Filed: July 6, 2018

Publication date: November 1, 2018

Inventors: Kaveh Khajavi, David E. Lane, II

6. SYSTEM AND METHOD FOR PREVENTING WRONG-SITE SURGERIES

Publication number: 20180289387

Abstract: A system and related methods of preventing wrong-site surgeries and blade-related injuries to OR personnel, which includes a computer software system (for use on computers or hand-held devices in the medical environment) in combination with a surgical supply carrier (such as a safety blade-dispenser or other surgical sharps dispenser). The surgical supply carrier comprises at least one component, such as a label, which prevents or impedes a surgeon from accessing one or more surgical instruments stored within until after a "time-out" is performed by the surgeon or authorized OR personnel to confirm various details including but not limited to correct patient, correct procedure, correct equipment, etc, before starting the intended surgical procedure. Data can be captured throughout the medical environment (from "decision-to-incision" and beyond) to assess wrong-site surgery data (including "near miss" data) and enable a host of analytics on wrong-site surgery prevention.

Type: Application

Filed: October 3, 2016

Publication date: October 11, 2018

Inventors: Kaveh Khajavi, David E. Lane, II, John G. Kerwood, Christopher Davis, Jonathan David Spangler, Timothy Brian Dentry

7. MULTI-FUNCTIONAL SANITIZATION APPARATUS AND RELATED METHODS

Publication number: 20180280554

Abstract: The present invention relates to a method and apparatus for preventing bacterial cross-contamination between a user's personal item and a bacterially sensitive environment. More particularly, the present invention is directed to a method and apparatus for sanitizing a user's hands and cell phone prior to the user entering into a steril operating room, thereby minimizing the introduction of contaminants via the cell phone.

Type: Application

Filed: November 23, 2016

Publication date: October 4, 2018

Inventors: Kaveh Khajavi, David E. Lane

8. Percutaneous pedicle screw revision system

Patent number: 10039573

Abstract: The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

Type: Grant

Filed: February 23, 2017

Date of Patent: August 7, 2018

Assignee: Amendia, Inc.

Inventors: Kaveh Khajavi, David E. Lane, II

9. Safety-Blade Dispenser and Related Methods

Publication number: 20170360523

Abstract: Safety-blade dispensers for safely storing surgical blades prior to surgery and optionally for retrieving used surgical blades after surgery. In either case, the safety-blade dispenser is configured to store one

or more surgical blades in an orientation that allows a user to simply and safely attach a surgical tool handle to the surgical blades (and optionally remove the handle from the surgical blades) without requiring the user to physically touch or manipulate the surgical blades by hand. The safety-blade dispensers disclosed herein may be used alone or in conjunction with a system and method of preventing wrong-site surgery.

Type: Application

Filed: May 4, 2017

Publication date: December 21, 2017

Inventors: Kaveh Khajavi, David E. Lane, II, Luke Boland, Christopher Davis, John G. Kerwood

10. SYSTEM AND METHOD FOR PREVENTING WRONG-SITE SURGERIES

Publication number: 20170329911

Abstract: A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. The system and method may also include a wrong site surgery profile used by individuals within the surgical procedure environment and third parties for tracking and determining if, and where, a wrong site surgical procedure occurred. The profile can be updated, tacked and monitored while a patient is interacting within the medical environment.

Type: Application

Filed: July 31, 2017

Publication date: November 16, 2017

Inventor: Kaveh Khajavi

11. System and method for preventing wrong-site surgeries

Patent number: 9721064

Abstract: A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. The system and method may also include a wrong site surgery profile used by individuals within the surgical procedure environment and third parties for tracking and determining if, and where, a wrong site surgical procedure occurred. The profile can be updated, tacked and monitored while a patient is interacting within the medical environment.

Type: Grant

Filed: October 2, 2015

Date of Patent: August 1, 2017

Assignee: StartBox, LLC

Inventor: Kaveh Khajavi

12. Percutaneous Pedicle Screw Revision System

Publication number: 20170164983

Abstract: The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

Type: Application

Filed: February 23, 2017

Publication date: June 15, 2017

Inventors: Kaveh Khajavi, David E. Lane, II

13. Percutaneous pedicle screw revision system

Patent number: 9610104

Abstract: The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

Type: Grant

Filed: July 25, 2014

Date of Patent: April 4, 2017

Assignee: Amendia, Inc.

Inventors: Kaveh Khajavi, David E. Lane, II

14. Spinal implant revision device

Patent number: 9451994

Abstract: A spinal implant revision device has a revision connector and a tulip member. The revision connector is configured for attachment to a pre-existing rod in a patient. The revision connector has a slotted opening configured to receive a first or a pre-existing rod. The tulip member is pivotally connected to the revision connector and movable in angularity within predetermined ranges in a first plane. This first plane is parallel to a rod to which the revision connector is attached. A second plane which is non-parallel to that first plane allows a second or new rod to be received in the tulip and allows the second rod to pivot relative to the first rod.

Type: Grant

Filed: June 30, 2015

Date of Patent: September 27, 2016

Assignee: Amendia, Inc.

Inventors: Dale Whipple, Jason Hayes Tillett, William C. Tally, Kaveh Khajavi

15. System and method for preventing wrong-site surgeries

Publication number: 20160022361

Abstract: A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. The system and method may also include a wrong site surgery profile used by individuals within the surgical procedure environment and third parties for tracking and determining if, and where, a wrong site surgical procedure occurred. The profile can be updated, tacked and monitored while a patient is interacting within the medical environment.

Type: Application

Filed: October 2, 2015

Publication date: January 28, 2016

Inventor: Kaveh Khajavi

16. System and method for preventing wrong-site surgeries

Patent number: 9168107

Abstract: A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. Preferably, the container top may be removed and placed between the surgeon and surgical technician to define a no-hands “neutral zone” to avoid being stuck by the sharps. Also, the container preferably includes compartments for storing used sharps and/or a local anesthetic-loaded syringe, and the top may be replaced and secured for safely disposing of the sharps after the surgery.

Type: Grant

Filed: December 30, 2013

Date of Patent: October 27, 2015

Assignee: StartBox, LLC

Inventor: Kaveh Khajavi

17. Spinous process fixation plate and minimally invasive method for placement

Patent number: 9149305

Abstract: The invention is directed to a laterally inserted spinous process plating device and a method for installing the device using a minimally invasive procedure. The device includes a partially threaded bolt as well as a contralateral and ipsilateral fixation plates, a deployment nut, a lag nut and a locking nut. Each fixation plate includes a pair of wing portions that are pivotally connected to one another to facilitate installation. The each of the fixation plates includes anchoring elements.

Type: Grant

Filed: October 14, 2010

Date of Patent: October 6, 2015

Assignee: Latitude Holdings, LLC

Inventors: Kaveh Khajavi, David E. Lane

18. Percutaneous Pedicle Screw Revision System

Publication number: 20150032158

Abstract: The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

Type: Application

Filed: July 25, 2014

Publication date: January 29, 2015

Invited Surgeon Faculty

1. Faculty for Lumbar corpectomy (NuVasive). San Diego, CA, Nov 1, 2019
2. Faculty for Lateral Position L5-S1 ALIF (NuVasive). Miami, FL, Sept 8, 2019
3. Lab faculty, Cleveland Clinic Spine Review Course. Cleveland, OH. July 18-22, 2019
4. Faculty for Lumbar corpectomy and L5-S1 ALIF in the Lateral Position (NuVasive). San Diego, CA, June 29, 2019
5. Faculty for Treatment of Degenerative Conditions at L4-S1 in the Lateral Position Course (NuVasive). San Diego, CA, May 19, 2018
6. Faculty for Treatment of Degenerative Conditions at L4-S1 in the Lateral Position Course (NuVasive). San Diego, CA, May 17, 2018
7. Instructor for Single Position Lateral Solutions to Treat L4-S1 Course (NuVasive). Atlanta, GA, May 12, 2018
8. Single Position Lateral Solutions to Treat L4-S1, Featuring Advanced 3D Printer Implants and LessRay Radiation Emission Reduction Technology. American Association of Neurologic Surgeons Annual Meeting, New Orleans, LA, April 30, 2018.
9. Instructor for NuVasive Lateral L5-S1 ALIF Course, Baltimore, MD, April 27, 2018
10. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, March 22-23, 2018
11. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, February 16, 2018

12. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, Dec 1-2, 2017
13. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, Nov 9-11, 2017
14. Piedmont Spine Update 2015, Atlanta, GA, 14 Nov 2015. Course Director
15. Advanced XLIF Course. Instructor for Surgeon's Visit Program (NuVasive), San Antonio, TX, 12-13 June 2015
16. Advanced XLIF Course. Instructor for Marquis Surgeon's Visit Program (NuVasive), Paramus, NJ. 27 June 2014.
17. Instructor for Minimal Access Spine Surgery Residents and Fellows Course (NuVasive). Paramus, NJ. 29 March 2014.
18. XLIF Research Symposium. Course Co-director. Hot Springs, VA November 2013
19. Minimally Invasive Spine Surgery. Instructor for Surgeon's Visit Program (NuVasive), Birmingham, AL 24 October 2013
20. Minimally Invasive Spine Surgery. Instructor for Surgeon's Visit Program (NuVasive), Huntsville, AL 7 August 2013
21. Advanced eXtreme Lateral Interbody Fusion Course. Instructor for Marquis Surgeon's Visit Program (NuVasive), Paramus, NJ. June 2013.
22. Expanded Indications for Lateral Lumbar Fusion Course. Instructor for Marquis Surgeon's Visit Program (NuVasive), Paramus, NJ. September 2012.
23. Advanced Lateral Lumbar Interbody Fusion Course. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, July 2012.
24. Masters Spinal Surgery Course. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, April 2011.
25. Complex Spinal Deformity Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, December 2010.
26. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), Walter Reed Army Medical/Bethesda Naval National Neurosurgery Consortium, Washington, DC, February 2010.
27. Expansive Cervical Laminoplasty: Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, April 2009.
28. Lateral Lumbar Fusion Options. Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, April 2009.
29. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program, Upstate Department of Neurosurgery, Syracuse, NY, September 2008.

30. Lateral Lumbar Fusion Options. Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, May 2008.
31. Instructor for Bethesda Spine Workshop, Cervical Section, Uniformed Services University of the Health Sciences, May 2008.
32. Lateral Lumbar Fusion Options. Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, May 2007.
33. Extreme Lateral Lumbar Interbody Fusion (XLIF). Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, June 2006.
34. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, April 2006.
35. Extreme Lateral Lumbar Interbody Fusion (XLIF). Instructor for Marquis Surgeon's Visit Program (NuVasive), South Florida Spine Clinic, February 2006.
36. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, August 2005.
37. Extreme Lateral Lumbar Interbody Fusion (XLIF). Course Co-Director (NuVasive), University of South Florida, July 2004.
38. Instructor for Bethesda Spine Workshop, Peripheral Nerve Section, Uniformed Services University of the Health Sciences, June 2000.

Invited Concussion Talks: NFL / Atlanta Falcons / Heads up / USA Football

1. Sports Concussions: Piedmont Brainstorm, 22 July 2011
2. Football Concussions. NFL Health & Safety Talk, Stone Mountain HS, 19 April 2012
