

# Curriculum Vitae

## **Kaveh Khajavi, MD, FACS, FAANS**

Board Certified, American Board of Neurological Surgery

## **Georgia Spine & Neurosurgery Center**

**Southeastern Neurosurgical Specialists**

980 Johnson Ferry Rd, #490, Atlanta, GA 30342

Phone: (404) 299-3338 or (404) 780-7811

Fax: (404) 299-3315 Web : GAspine.com

### **Certification & Licensure**

- Diplomat of the American Board of Neurological Surgery since 1999 (FAANS)
- Fellow of the American College of Surgeons since 1998 (FACS)
- Georgia State Medical License since 2002

### **Current & Recent Positions**

- Founder and President, Georgia Spine & Neurosurgery Center, Atlanta, GA. (2003-present)
- Founder & Chief Medical Officer, StartBox® LLC, Atlanta, GA.
- Neurosurgical Consultant, **Atlanta Falcons Football Club**, Atlanta, GA (2008-2020)
- Neurosurgical Consultant, **United States Major League Rugby** (2018-2021)
- Team Neurosurgeon, Rugby ATL, Atlanta GA (2019-2020)
- Lead Neurosurgeon, Shepherd Center Complex Concussion Clinic
- Neurosurgical Consultant, Georgia State University Athletic Department, Atlanta, GA (2013-2020)
- Medical Advisory Board, Aspire Medical Partners, Atlanta, GA
- Consultant, NuVasive Inc., San Diego, CA 92121 (2004-present)
- Medical Officer, NanoHive Medical, Woburn, MA 01801
- Surgical Advisory Board, Spinal Simplicity, Overland Park, KS (2018-2021)
- Board of Directors & Advisory Board, Brain Injury Association of Georgia, Atlanta, GA
- Director of Neurosurgery, Scottsdale Center for the Advancement of Neuroscience, Scottsdale, AZ
- Advisory Board, Kids & Pros Inc., Atlanta, GA
- Team Neurosurgeon, Georgia Swarm Professional Lacrosse Club, Atlanta, GA (2013-2020)
- Team Neurosurgeon, Atlanta Rollergirls, Atlanta, GA (2013-2020)

- Board of Directors, Georgia Concussion Coalition, Atlanta, GA (2011-2014)
- Chairman Board of Directors, Institute for Neurosurgical & Spinal Research Foundation (INSPIRE), Atlanta, GA (2012-2019)
- Neurosurgical Consultant Atlanta Thrashers Hockey Club, Atlanta, GA (2009-2011)
- Team Neurosurgeon, Atlanta Silverbacks, NASL, Atlanta, GA (2013-2016)
- Director of Minimally Invasive Spine Surgery, Piedmont Physicians Neurosurgery (2015-2018)
- Director of Neurosurgical Services, The Shepherd Center (2015-2018)
- Medical Executive Committee Member, The Shepherd Center (2015-2018)
- Director of Neurosurgery, Sports Concussion Institute, Atlanta, GA (2012-2016)
- Chief of Neurosurgery, DeKalb Medical Center, Decatur GA (2006-2011)

### Previous Employment History

- **Nov 2018 - present: Southeastern Neurosurgical Specialists, Northside Hospital, Atlanta, GA**
- 2015-2018: Director Minimally Invasive Spine Surgery, Piedmont Atlanta Hospital, Atlanta, GA
- **2003 - present: Founder, Georgia Spine & Neurosurgery Center**
- 2006 – 2011: Chief of Neurosurgery, DeKalb Medical Center, Decatur, GA
- April 2004- Nov 2018: Neurosurgeon, Piedmont Atlanta Hospital, Atlanta, GA
- Mar 2002 – Sept 2003: Neurosurgeon, WellStar Health Systems, Marietta, GA
- July 2000 – Feb 2002: Neurosurgeon, Houston Spine and Neurosurgery Center, Houston, TX
- Sept 1997 – July 2000: Staff Neurosurgeon, Walter Reed Army Medical Center, Washington, DC
- Aug 1996 – Sept 1997: Staff Neurosurgeon, William Beaumont Army Medical Center, El Paso, TX

### Academic Appointments

- Adjunct Professor, Dept. of Physical Therapy, Georgia State University, Atlanta GA
- Adjunct Professor, Dept. of Physical Therapy, Mercer Univ. College of Health Professions, Atlanta, GA
- Chief, Epilepsy and Functional Surgery Section, Department of Neurosurgery, Walter Reed Army Medical Center, Washington, DC (1997-2000)
- Assistant Professor, Department of Surgery, Uniformed Services University of the Health Sciences, Bethesda, MD (1997-2000)
- Assistant Professor, Department of Neurology, Uniformed Services University of the Health Sciences, Bethesda, MD (1997-2000)

## Residency

- General Surgery Internship, Baylor College of Medicine, Houston, TX. June 1989- Feb 1991
- Neurosurgery Residency, Cleveland Clinic Foundation, Cleveland, OH. Mar 1991- July 1996

## Education

- Bachelor of Arts (Chemistry), Emory University, Atlanta, GA. May 1985
- Doctor of Medicine, Georgetown University School of Medicine, Washington, DC. May 1989

## Military Background

- Commissioned 2<sup>nd</sup> Lieutenant, United States Air Force, April 1985
- Promoted to Captain, United States Air Force, May 1989
- Promoted to Major, United States Air Force, July 1996
- Air Force Commendation Medal, Oct 1997
- Meritorious Service Medal, May 2000

## Professional Affiliations (current or former)

- American College of Surgeons
- American Association of Neurological Surgeons
- Society of Lateral Access Surgery (Founding Member)
- AANS/CNS Joint Spine and Peripheral Nerve Section
- Society of Minimally Invasive Spine Surgery
- International Society for the Advancement of Spine Surgery
- North American Spine Society
- AANS/CNS Trauma and Critical Care Section
- Congress of Neurological Surgeons
- Military Spine Study Group
- Georgia Neurosurgical Society

- Georgia Concussion Coalition
- Brain Injury Association of Georgia
- Medical Association of Georgia

## Publications

1. Gloystein D, Jackson K, **Khajavi K**. Innovative Technology System to Prevent Wrong Site Surgery, Capture & Reduce Near-Misses: A Longitudinal Review of 1187 cases. Submitted to The Joint Commission Journal on Quality and Patient Safety.

### Invited Surgeon Faculty

1. Faculty for XLIF in Lumbar Degenerative Conditions Course (NuVasive). San Diego, CA, Aug 27, 2022
2. Faculty for Lumbar Corpectomy Course (NuVasive). San Diego, CA, Nov 1, 2019
3. Faculty for Lateral Position L5-S1 ALIF Course (NuVasive). Miami, FL, Sept 8, 2019
4. Lab faculty, Cleveland Clinic Spine Review Course. Cleveland, OH. July 18-22, 2019
5. Faculty for Lumbar Corpectomy Course and L5-S1 ALIF in the Lateral Position (NuVasive). San Diego, CA, June 29, 2019
6. Faculty for Treatment of Degenerative Conditions at L4-S1 in the Lateral Position Course (NuVasive). San Diego, CA, May 19, 2018
7. Faculty for Treatment of Degenerative Conditions at L4-S1 in the Lateral Position Course (NuVasive). San Diego, CA, May 17, 2018
8. Instructor for Single Position Lateral Solutions to Treat L4-S1 Course (NuVasive). Atlanta, GA, May 12, 2018
9. Single Position Lateral Solutions to Treat L4-S1, Featuring Advanced 3D Printer Implants and LessRay Radiation Emission Reduction Technology. American Association of Neurologic Surgeons Annual Meeting, New Orleans, LA, April 30, 2018.
10. Instructor for NuVasive Lateral L5-S1 ALIF Course, Baltimore, MD, April 27, 2018
11. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, March 22-23, 2018
12. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, February 16, 2018
13. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, Dec 1-2, 2017
14. Instructor for NuVasive Lateral L5-S1 ALIF Course, San Diego, CA, Nov 9-11, 2017

15. Course Director , Piedmont Spine Update 2015, Atlanta, GA, 14 Nov 2015.
16. Advanced XLIF Course. Instructor for Surgeon's Visit Program (NuVasive), San Antonio, TX, 12-13 June 2015
17. Advanced XLIF Course. Instructor for Marquis Surgeon's Visit Program (NuVasive), Paramus, NJ. 27 June 2014.
18. Instructor for Minimal Access Spine Surgery Residents and Fellows Course (NuVasive). Paramus, NJ. 29 March 2014.
19. XLIF Research Symposium. Course Co-director. Hot Springs, VA November 2013
20. Minimally Invasive Spine Surgery. Instructor for Surgeon's Visit Program (NuVasive), Birmingham, AL 24 October 2013
21. Minimally Invasive Spine Surgery. Instructor for Surgeon's Visit Program (NuVasive), Huntsville, AL 7 August 2013
22. Advanced eXtreme Lateral Interbody Fusion Course (NuVasive). Instructor for Marquis Surgeon's Visit Program, Paramus, NJ. June 2013
23. Expanded Indications for Lateral Lumbar Fusion Course (NuVasive). Instructor for Marquis Surgeon's Visit Program, Paramus, NJ. September 2012.
24. Advanced Lateral Lumbar Interbody Fusion Course (NuVasive). Instructor for Marquis Surgeon's Visit Program, San Diego, CA, July 2012.
25. Masters Spinal Surgery Course. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, April 2011.
26. Complex Spinal Deformity Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, December 2010.
27. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), Walter Reed Army Medical/Bethesda Naval National Neurosurgery Consortium, Washington, DC, February 2010.
28. Expansive Cervical Laminoplasty: Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, April 2009.
29. Lateral Lumbar Fusion Options. Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, April 2009.
30. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program, Upstate Department of Neurosurgery, Syracuse, NY, September 2008.

31. Lateral Lumbar Fusion Options. Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, May 2008.
32. Instructor for Bethesda Spine Workshop, Cervical Section, Uniformed Services University of the Health Sciences, May 2008.
33. Lateral Lumbar Fusion Options. Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, May 2007.
34. Extreme Lateral Lumbar Interbody Fusion (XLIF). Instructor for Bethesda Spine Workshop, Uniformed Services University of the Health Sciences, June 2006.
35. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, April 2006.
36. Extreme Lateral Lumbar Interbody Fusion (XLIF). Instructor for Marquis Surgeon's Visit Program (NuVasive), South Florida Spine Clinic, February 2006.
37. Maximum Access Spine Surgery. Instructor for Marquis Surgeon's Visit Program (NuVasive), San Diego, CA, August 2005.
38. Extreme Lateral Lumbar Interbody Fusion (XLIF). Course Co-Director (NuVasive), University of South Florida, July 2004.
39. Instructor for Bethesda Spine Workshop, Peripheral Nerve Section, Uniformed Services University of the Health Sciences, June 2000.

### **Invited Concussion Talks: NFL / Atlanta Falcons / Heads up / USA Football**

1. Sports Concussions: Piedmont Brainstorm, 22 July 2011
2. Football Concussions. NFL Health & Safety Talk, Stone Mountain HS, 19 April 2012
3. Sports head injuries. Chiropractic & Beyond Fall Seminars, Marietta GA, 3 Dec 2011.
4. Football Concussions. Atlanta Falcons Coaches Clinic, Flowery Branch GA, 14 June 2013
5. Football Concussions. USA Football Player Safety Clinic, Marist High school, Atlanta, GA, July 2013
6. Football Concussions. USA Football Player Safety Clinic, Marist High school, Atlanta, GA, 3 August 2013

7. Sports head injuries. Chiropractic & Beyond Fall Seminars, Marietta, GA, 6 Oct 2012
8. Sports head injuries. Chiropractic & Beyond Fall Seminars, Marietta, GA, 1 Dec 2012
9. Football Concussions. NFL Mom's clinic, Kings Ridge Christian School, Alpharetta GA, 18 March 2014
10. Football Concussions. NFL Mom's clinic, Sandy Creek High School, Tyrone GA, 22 April 2014
11. Football Concussions. USA / Heads up football, Atlanta, GA, 15 July 2014

## Patents

### 1. Percutaneous Pedicle Screw Revision System

**Publication number:** 20210113245

**Abstract:** The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

**Type:** Application

**Filed:** December 9, 2020

**Publication date:** April 22, 2021

**Inventors:** Kaveh Khajavi, David E. Lane, II

### 2. Percutaneous pedicle screw revision system

**Patent number:** 10888355

**Abstract:** The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

**Type:** Grant

**Filed:** July 6, 2018

**Date of Patent:** January 12, 2021

**Assignee:** Spinal Elements, Inc.

**Inventors:** Kaveh Khajavi, David E. Lane, II

### 3. Safety-Blade Dispenser and Related Methods

**Publication number:** 20200261177

**Abstract:** Safety-blade dispensers for safely storing surgical blades prior to surgery and optionally for retrieving used surgical blades after surgery. In either case, the safety-blade dispenser is configured to store one or more surgical blades in an orientation that allows a user to simply and safely attach a surgical tool handle to the surgical blades (and optionally remove the handle from the surgical blades) without requiring the

user to physically touch or manipulate the surgical blades by hand. The safety-blade dispensers disclosed herein may be used alone or in conjunction with a system and method of preventing wrong-site surgery.

**Type:** Application

**Filed:** September 16, 2019

**Publication date:** August 20, 2020

**Inventors:** Kaveh Khajavi, David E. Lane, II, Luke Boland, Christopher Davis, John G. Kerwood

#### 4. **Safety-blade dispenser and related methods**

**Patent number:** 10413378

**Abstract:** Safety-blade dispensers for safely storing surgical blades prior to surgery and optionally for retrieving used surgical blades after surgery. In either case, the safety-blade dispenser is configured to store one or more surgical blades in an orientation that allows a user to simply and safely attach a surgical tool handle to the surgical blades (and optionally remove the handle from the surgical blades) without requiring the user to physically touch or manipulate the surgical blades by hand. The safety-blade dispensers disclosed herein may be used alone or in conjunction with a system and method of preventing wrong-site surgery.

**Type:** Grant

**Filed:** May 4, 2017

**Date of Patent:** September 17, 2019

**Assignee:** STARTBOX, LLC

**Inventors:** Kaveh Khajavi, David E. Lane, II, Luke Boland, Christopher Davis, John G. Kerwood

#### 5. **Percutaneous Pedicle Screw Revision System**

**Publication number:** 20180310963

**Abstract:** The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

**Type:** Application

**Filed:** July 6, 2018

**Publication date:** November 1, 2018

**Inventors:** Kaveh Khajavi, David E. Lane, II

#### 6. **SYSTEM AND METHOD FOR PREVENTING WRONG-SITE SURGERIES**

**Publication number:** 20180289387

**Abstract:** A system and related methods of preventing wrong-site surgeries and blade-related injuries to OR personnel, which includes a computer software system (for use on computers or hand-held devices in the medical environment) in combination with a surgical supply carrier (such as a safety blade-dispenser or other surgical sharps dispenser). The surgical supply carrier comprises at least one component, such as a label, which prevents or impedes a surgeon from accessing one or more surgical instruments stored within until after a "time-out" is performed by the surgeon or authorized OR personnel to confirm various details including but not limited to correct patient, correct procedure, correct equipment, etc, before starting the intended surgical procedure. Data can be captured throughout the medical environment (from "decision-to-incision" and beyond) to assess wrong-site surgery data (including "near miss" data) and enable a host of analytics on wrong-site surgery prevention.

**Type:** Application

**Filed:** October 3, 2016

**Publication date:** October 11, 2018

**Inventors:** Kaveh Khajavi, David E. Lane, II, John G. Kerwood, Christopher Davis, Jonathan David Spangler, Timothy Brian Dentry

## 7. MULTI-FUNCTIONAL SANITIZATION APPARATUS AND RELATED METHODS

**Publication number:** 20180280554

**Abstract:** The present invention relates to a method and apparatus for preventing bacterial cross-contamination between a user's personal item and a bacterially sensitive environment. More particularly, the present invention is directed to a method and apparatus for sanitizing a user's hands and cell phone prior to the user entering into a steril operating room, thereby minimizing the introduction of contaminants via the cell phone.

**Type:** Application

**Filed:** November 23, 2016

**Publication date:** October 4, 2018

**Inventors:** Kaveh Khajavi, David E. Lane

## 8. Percutaneous pedicle screw revision system

**Patent number:** 10039573

**Abstract:** The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

**Type:** Grant

**Filed:** February 23, 2017

**Date of Patent:** August 7, 2018

**Assignee:** Amendia, Inc.

**Inventors:** Kaveh Khajavi, David E. Lane, II

## 9. Safety-Blade Dispenser and Related Methods

**Publication number:** 20170360523

**Abstract:** Safety-blade dispensers for safely storing surgical blades prior to surgery and optionally for retrieving used surgical blades after surgery. In either case, the safety-blade dispenser is configured to store one or more surgical blades in an orientation that allows a user to simply and safely attach a surgical tool handle to the surgical blades (and optionally remove the handle from the surgical blades) without requiring the user to physically touch or manipulate the surgical blades by hand. The safety-blade dispensers disclosed herein may be used alone or in conjunction with a system and method of preventing wrong-site surgery.

**Type:** Application

**Filed:** May 4, 2017

**Publication date:** December 21, 2017

**Inventors:** Kaveh Khajavi, David E. Lane, II, Luke Boland, Christopher Davis, John G. Kerwood

## 10. SYSTEM AND METHOD FOR PREVENTING WRONG-SITE SURGERIES

**Publication number:** 20170329911

**Abstract:** A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. The system and method may also include a wrong site surgery profile used by individuals within the surgical procedure environment and third parties for tracking and determining if, and where, a wrong site surgical procedure occurred. The profile can be updated, tacked and monitored while a patient is interacting within the medical environment.

**Type:** Application

**Filed:** July 31, 2017

**Publication date:** November 16, 2017

**Inventor:** Kaveh Khajavi

## **11. System and method for preventing wrong-site surgeries**

**Patent number:** 9721064

**Abstract:** A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. The system and method may also include a wrong site surgery profile used by individuals within the surgical procedure environment and third parties for tracking and determining if, and where, a wrong site surgical procedure occurred. The profile can be updated, tacked and monitored while a patient is interacting within the medical environment.

**Type:** Grant

**Filed:** October 2, 2015

**Date of Patent:** August 1, 2017

**Assignee:** StartBox, LLC

**Inventor:** Kaveh Khajavi

## **12. Percutaneous Pedicle Screw Revision System**

**Publication number:** 20170164983

**Abstract:** The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

**Type:** Application

**Filed:** February 23, 2017

**Publication date:** June 15, 2017

**Inventors:** Kaveh Khajavi, David E. Lane, II

## **13. Percutaneous pedicle screw revision system**

**Patent number:** 9610104

**Abstract:** The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

**Type:** Grant

**Filed:** July 25, 2014

**Date of Patent:** April 4, 2017

**Assignee:** Amendia, Inc.

**Inventors:** Kaveh Khajavi, David E. Lane, II

#### **14. Spinal implant revision device**

**Patent number:** 9451994

**Abstract:** A spinal implant revision device has a revision connector and a tulip member. The revision connector is configured for attachment to a pre-existing rod in a patient. The revision connector has a slotted opening configured to receive a first or a pre-existing rod. The tulip member is pivotally connected to the revision connector and movable in angularity within predetermined ranges in a first plane. This first plane is parallel to a rod to which the revision connector is attached. A second plane which is non-parallel to that first plane allows a second or new rod to be received in the tulip and allows the second rod to pivot relative to the first rod.

**Type:** Grant

**Filed:** June 30, 2015

**Date of Patent:** September 27, 2016

**Assignee:** Amendia, Inc.

**Inventors:** Dale Whipple, Jason Hayes Tillett, William C. Tally, Kaveh Khajavi

#### **15. System and method for preventing wrong-site surgeries**

**Publication number:** 20160022361

**Abstract:** A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. The system and method may also include a wrong site surgery profile used by individuals within the surgical procedure environment and third parties for tracking and determining if, and where, a wrong site surgical procedure occurred. The profile can be updated, tacked and monitored while a patient is interacting within the medical environment.

**Type:** Application

**Filed:** October 2, 2015

**Publication date:** January 28, 2016

**Inventor:** Kaveh Khajavi

#### **16. System and method for preventing wrong-site surgeries**

**Patent number:** 9168107

**Abstract:** A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. Preferably, the container top may be removed and placed between the surgeon and surgical technician to define a no-hands “neutral zone” to avoid being stuck by the sharps. Also, the container preferably includes compartments for storing used sharps and/or a local anesthetic-loaded syringe, and the top may be replaced and secured for safely disposing of the sharps after the surgery.

**Type:** Grant

**Filed:** December 30, 2013

**Date of Patent:** October 27, 2015

**Assignee:** StartBox, LLC

**Inventor:** Kaveh Khajavi

#### **17. Spinous process fixation plate and minimally invasive method for placement**

**Patent number:** 9149305

**Abstract:** The invention is directed to a laterally inserted spinous process plating device and a method for installing the device using a minimally invasive procedure. The device includes a partially threaded bolt as well as a contralateral and ipsilateral fixation plates, a deployment nut, a lag nut and a locking nut. Each fixation plate includes a pair of wing portions that are pivotally connected to one another to facilitate installation. The each of the fixation plates includes anchoring elements.

**Type:** Grant

**Filed:** October 14, 2010

**Date of Patent:** October 6, 2015

**Assignee:** Latitude Holdings, LLC

**Inventors:** Kaveh Khajavi, David E. Lane

#### **18. Percutaneous Pedicle Screw Revision System**

**Publication number:** 20150032158

**Abstract:** The present invention describes a system, devices and methods for percutaneous pedicle screw revision procedures. The present invention utilizes a tulip rod stub/connector adapted to be used to extend pedicle screw/rod constructs with minimal disruption to surrounding soft tissue and without having to remove existing hardware.

**Type:** Application

**Filed:** July 25, 2014

**Publication date:** January 29, 2015

**Inventors:** Kaveh Khajavi, David E. Lane, II

#### **19. System and method for preventing wrong-site surgeries**

**Publication number:** 20140110298

**Abstract:** A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the

container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. Preferably, the container top may be removed and placed between the surgeon and surgical technician to define a no-hands “neutral zone” to avoid being stuck by the sharps. Also, the container preferably includes compartments for storing used sharps and/or a local anesthetic-loaded syringe, and the top may be replaced and secured for safely disposing of the sharps after the surgery.

**Type:** Application

**Filed:** December 30, 2013

**Publication date:** April 24, 2014

**Applicant:** StartBox, LLC

**Inventor:** Kaveh Khajavi

## 20. Spinal implant revision device

**Patent number:** RE46840

**Abstract:** A spinal implant revision device has a revision connector and a tulip member. The revision connector is configured for attachment to a pre-existing rod in a patient. The revision connector has a slotted opening configured to receive a first or a pre-existing rod. The tulip member is pivotally connected to the revision connector and movable in angularity within predetermined ranges in a first plane. This first plane is parallel to a rod to which the revision connector is attached. A second plane which is non-parallel to that first plane allows a second or new rod to be received in the tulip and allows the second rod to pivot relative to the first rod.

**Type:** Grant

**Filed:** July 5, 2017

**Date of Patent:** May 15, 2018

**Assignee:** Amendia, Inc.

**Inventors:** Dale Whipple, Jason Hayes Tillett, William C. Tally, Kaveh Khajavi, Geoffrey Toon

## 21. System and method for preventing wrong-site surgeries

**Patent number:** 8616215

**Abstract:** A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. Preferably, the container top may be removed and placed between the surgeon and surgical technician to define a no-hands “neutral zone” to avoid being stuck by the sharps. Also, the container preferably includes compartments for storing used sharps and/or a local anesthetic-loaded syringe, and the top may be replaced and secured for safely disposing of the sharps after the surgery.

**Type:** Grant

**Filed:** November 9, 2005

**Date of Patent:** December 31, 2013

**Assignee:** StartBox, LLC

**Inventors:** Kaveh Khajavi, James D. Griffin

## 22. Spinous process fixation plate and minimally invasive method for placement

**Publication number:** 20110087285

**Abstract:** The invention is directed to a laterally inserted spinous process plating device and a method for installing the device using a minimally invasive procedure. The device includes a partially threaded bolt as well as a contralateral and ipsilateral fixation plates, a deployment nut, a lag nut and a locking nut. Each fixation plate includes a pair of wing portions that are pivotally connected to one another to facilitate installation. The each of the fixation plates includes anchoring elements.

**Type:** Application

**Filed:** October 14, 2010

**Publication date:** April 14, 2011

**Inventors:** Kaveh Khajavi, David E. Lane

### **23. System and method for preventing wrong-site surgeries**

**Publication number:** 20060096877

**Abstract:** A container holds at least one surgical implement, has a lock mechanism, and has a signature label that impedes access to the surgical implement until the correct surgical site is confirmed. A method of using the container includes the steps of confirming the correct surgical site, signing the label and removing it from the container, placing the label in the medical record, unlocking the container, removing the implement, and beginning the surgery, wherein the surgical team is forced to pause to confirm the correct surgical site before starting the surgery. Preferably, the container top may be removed and placed between the surgeon and surgical technician to define a no-hands "neutral zone" to avoid being stuck by the sharps. Also, the container preferably includes compartments for storing used sharps and/or a local anesthetic-loaded syringe, and the top may be replaced and secured for safely disposing of the sharps after the surgery.

**Type:** Application

**Filed:** November 9, 2005

**Publication date:** May 11, 2006

**Inventors:** Kaveh Khajavi, James Griffin
